

CHANGE IS IN YOUR HANDS

May 2019

START COMPOSTING FOR A WASTE-FREE WORLD

Food scraps and
packaging go in
one bin!

ORGANIC
WASTE ONLY
COMPOST BIN

CATERING FOR THE NEXT GENERATION

We create packaging solutions for a circular economy where there is no waste. It starts with responsibly sourced materials, continues with environmentally certified manufacturing processes, and ends with disposal options that see resources reused or regenerated.

Change is in your hands.

GOOD FOR THE PLANET

BioPak compostable packaging is made from plants, not plastic. We use responsibly-sourced, rapidly-renewable materials instead of finite fossil fuel resources — like those used to create conventional single-use plastic packaging.

Our packaging is carbon neutral: from resourcing to manufacturing, delivery to disposal. Our compost service is reaching new suburbs across Australia and New Zealand every week. We donate 5% of our profits to environmental restoration initiatives with Rainforest Rescue (Australia), Forest & Bird (New Zealand), and community programs in conjunction with our charity partners regionally.

GOOD FOR THE BUSINESS

Compostable packaging isn't just good for the future of our planet, it's good for business too. New statistics reveal the majority of consumers would change their consumption habits to reduce their impact on the environment (Nielsen). Businesses that use BioPak products are increasing their sales, as customers demand change.

At BioPak, you'll get a quality, sustainable product and great service: efficient online ordering, personalised support, fast delivery, optional custom branding. Our automated processes and economies of scale mean we can guarantee that you will never run out of stock whilst always receiving the best price.

We are a certified B Corp – an accreditation that shows we are a profit for purpose business. We are redefining success in business by competing not to be the best in the world, but to be the best **for** the world.

GOOD FOR THE PLANET

Compostable, single-use packaging

Make the switch to certified compostable packaging made from plants, not oil-based plastic.

Compost service

We launched the BioPak Compost Service to collect packaging and food scraps, which reduces waste to landfill. 300+ tonnes of waste has been diverted so far. Now available in 2,200+ suburbs in Australia and New Zealand.

Certified eco-friendly packaging

Know your packaging is made in facilities that are certified to global environmental, ethical and quality management standards.

Carbon neutral products

BioPak purchase carbon credits to offset emissions associated with our packaging – from resource to disposal and everything in between.

Delivery emissions are offset

BioPak packaging is carbon neutral from resource to manufacturing to delivery.

Custom packaging

Our experienced design team will help you with free concept creation, design and more to develop bespoke packaging solutions.

Give back program

We donate 5% of our profits to positive change via our charity partnerships. On behalf of our customers, we protect and restore threatened ecosystems.

GOOD FOR BUSINESS

Join the #plasticfree movement

Consumers are becoming more environmentally conscious, and they're voting with their dollars. Together for a better future.

Simplify waste disposal with one bin

Food waste contamination is a real problem for recycling – but not for composting. Simplify waste disposal by putting organics and compostable packaging in one bin. Work towards sending zero waste to landfill.

Responsible across the supply chain

Be confident in your environmental claims with packaging made in certified environmentally responsible facilities.

Offset emissions from resource to disposal

Certified products mean you can celebrate going green. Reduce your carbon footprint and environmental impact.

Same day delivery

Same day delivery in metro areas and fast delivery to regional areas using a network of 70+ couriers.

Never run out of stock

BioPak's enterprise inventory management software ensures that you'll never run out of stock. We offer storage so you can order on demand (conditions apply).

Profit for purpose promotion

Our monthly reports quantify the positive impact you are making by supporting the circular economy. Share with your customers so they can see how they too are influencing positive change.

JOIN THE COMPOST SERVICE

Demand for single-use foodservice packaging isn't slowing down. And while it's always better to BYO, we need sustainable solutions for our consumption conundrums. That's why we've launched the BioPak Compost Service – a resource collection service that puts packaging, food scraps and organics into the compost stream where they will be transformed into a useful material that plays a crucial role in regeneration: soil.

Available in major capital cities and 2,200+ postcodes across Australia and New Zealand

Choose compostable packaging

Waste to compost within 12 weeks

KNOW YOUR BIOPAK PACKAGING SYMBOLS

Disposal

Commercially
compostable

Home
compostable

Compostable

These symbols identify packaging that is independently certified as either home or commercially compostable. Commercially compostable certified products will disintegrate within 84 days and biodegrade within 180 days in industrial composting conditions. Certified home compostable products will biodegrade within 365 days in home composting conditions. We list the certification standards and our unique certificate number.

Recyclable

This packaging can be recycled through kerbside recycling collection – just make sure it's rinsed clean and free from grease and oil.

Product materials

Responsibly sourced paper and wood

We only use raw materials from responsibly managed plantations, including FSC® certified plantations, to ensure our forests are protected forever.

Bioplastic/ Polylactic acid (PLA)

Our plant-based bioplastic packaging is either home or commercially compostable and has a lower carbon footprint than conventional plastic packaging. It is not recyclable with conventional non-compostable plastics.

Sugarcane pulp/ Bagasse

Our sugarcane pulp packaging is made from sugarcane pulp (also known as bagasse), a by-product of the sugar refining industry. Sugarcane pulp packaging can be recycled in the cardboard recycling stream if not contaminated with food.

Conventional plastic

We're in the process of phasing out all non-compostable plastic items. This type of plastic is well-marked so you can identify whether they're kerbside recyclable – they are **not** compostable.

Product features

Customisable

Our experienced design team is here to assist with custom branding or bespoke mould sugarcane pulp solutions.

Hot or cold use

Our hot food friendly packaging is grease-proof and sturdy, and will retain its structural integrity whilst holding hot food. Our clear bioplastic cups and bowls are cold use only.

Microwave and oven safe

We have noted which packaging is microwave and/or oven safe. Our sugarcane takeaway range can go in the oven at temperatures of up to 220°C for a maximum duration of 20 minutes.

Freezer safe

This symbol means the packaging is safe to use in the freezer, however, the structural integrity will vary depending on the food contained when frozen and thawed. We can supply samples for you to conduct testing.

HOT CUPS AND LIDS

BioCups and lids are certified commercially compostable to AS4736 standards

Paper cups & lids

Hot cups made with paper from managed plantations and lined with Ingeo™ – a commercially compostable plant-based lining.

ByoCups

Reusable coffee cups made from plants with a silicon sleeve and lid.

UNIVERSAL LID SOLUTIONS

Choose from a wide range of cup sizes to suit all your coffee needs. We have smaller volume 10 and 12oz 80mm diameter cups if a standard 12oz is too large. They neatly match our 6 and 8oz cups, and as a series, they all fit our small lids. We also offer a wider rimmed 8oz 90mm diameter cup that fits our large lids, alongside our standard 12, 16 and 20oz cups.
